

JESS WILSON

Creative Developer | Design × Code | Vancouver, BC

contact@jessicapswilson.com • jessicapswilson.com • linkedin.com/jessicapswilson • github.com/jps-wilson

SUMMARY

Creative Developer with hands-on experience across React, Vite, and modern JavaScript, currently completing a New Media Design & Web Development diploma at BCIT. Strongest on the front end, translating Figma-based designs into production interfaces, with a track record of shipping personal and client projects independently. Comfortable connecting to backend services and continuing to grow that range within a structured team.

EXPERIENCE

Freelance Creative Developer – Jess Wilson, Vancouver, BC

2026 – Present

- Built the front end for EcoMeter, a client web app, in React and Vite from a Figma-first design system, including a 4px-base spacing token system and a locked homepage creative direction
- Owned the project end-to-end as a sole proprietor: scoped and signed a fixed-rate contract, raised invoices through Wave, and ran the client workspace in Notion

Barista – Starbucks, Vancouver, BC

2024 – 2025

- Maintained quality and speed in a high-volume, fast-paced environment while delivering consistent, friendly customer service

Public Relations Associate (Contract) – Artsbiz Public Relations, Vancouver, BC

2020 – 2024

- Created and managed social media content and campaigns for arts-focused clients
- Supported the PR Director at media days, press conferences, and live events
- Managed PR materials and tracked expenses while building lasting client relationships

SELECTED PROJECTS

Margin — React, Node/Express, Figma API, relational data

- Built and deployed a Figma diff tool that compares design versions and surfaces what changed, including a custom diff engine and a clip-path scrubber UI
- Shipped to production on Vercel and Render; integrated as a complete case study in a live portfolio

Momentum — JavaScript, localStorage

- Built a privacy-first task manager with no account, no backend, and no data collection; tasks auto-categorize into Today, Upcoming, and Completed with drag-and-drop reordering, all state persisted on-device locally

Pressure — React, GSAP, Framer Motion

- Designed and built an atmospheric weather app with custom scroll-triggered animation sequences

EDUCATION

New Media Design & Web Development Diploma — BCIT

May 2025 – Nov 2026 (in progress)

Speaker, Web Summit Vancouver — BCIT Student Showcase: AI as a Storytelling Amplifier

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3/SASS, Node.js/Express

Tools & Workflow: Figma, Vite, Git/GitHub, Vercel, AI-assisted development workflows (Claude Code)

Other: RESTful APIs, responsive/mobile-first design, design systems, client communication, project ownership
